Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may have material impact in future.

INTERNAL RISK FACTORS

1. ***Our long-term growth and competitiveness are highly dependent on our ability to control costs and pass on any increase in operating expenses to customers, while continuing to offer competitive pricing.***

To maintain competitive pricing and enhance our profit margins, we must continuously control our costs. Some of our expenses such as service fee to carrier partner, linehaul charges, loading-unloading charges, custom clearance charges, vehicle rental expenses, represent some of our most significant recurring operating costs and any increase in such costs or our inability to pass on some or all of such increase to our customers will adversely affect our results of operations and cash flows. Further, challenges faced by our carrier partners such fluctuation in fuel prices due to global and domestic factors, geopolitical uncertainties which lead to increase in service fee by our carrier partners. Further, instances such as the supply-demand imbalance in air cargo and shipping industry due to various factors including decrease in world trade, high inflation, volatility in fuel price, war in Ukraine may also affect our ability to maintain competitive pricing or enhance our profit margins. Furthermore, the GoI may

implement new laws or other regulations and policies that could affect the logistics industry in general, including requiring additional approvals or licenses, imposing additional restrictions on our or our third-party network operations or tightening the enforcement of existing or new laws or regulations, any of which could require us to incur additional expenses to comply with such laws and regulations. If we suffer any increases in expenses and are unable to pass on such increases to our customers, our operating margins, and consequently, our business and profitability may be adversely affected.

The logistics Industry historically has experienced cyclical fluctuations in financial results economic factors which may be beyond control. Our cost of direct expenses to turnover ratio has been 71.69%, 75.88%, 84.63% and 86.07% for the period ended January 31, 2024, the Financial Year ended March 31, 2023, Financial Year ended March 31, 2022 and Financial Year ended March 31, 2021, respectively. The shipping costs and other transportation, labour or other costs depend on factors not under our control, including but not limited to general economic conditions, global and domestic market prices, competition, import restrictions, transportation costs etc, and these prices are cyclical in nature, which would lead to increase in cost and eventually affect the profits of our Company. If economic recession or a downturn in our customers' business cycle causes a reduction in the volume of freight shipped by those customers, our operating results could also be adversely affected.

2. *Our Company requires certain statutory and regulatory approvals for conducting our business and our failure to obtain, retain or renew them in a timely manner, or at all, may adversely affect our operations.*

Our business requires us to obtain and renew from time to time, certain approvals, licenses, registrations and permits from various regulatory authorities such as Authorized Economic Operator (AEO) Certificate, Certificate of Membership – Membership of Association of Multimodal Transport Operators of India, Registration with Mazagaon Docks Shipbuilders Limited as an approved supplier for Clearing Agent For Sea & Air Cargo (Service) and Freight Forwarder & Consolidation Agent, Licence for Custom Broker, Certificate of Registration as Multimodal Transport Operator (MTO), Certificate of Membership as Associate Member for Federation of Freight Forwarders' Associations in India. For details of our business activities and licenses and registrations with various regulatory authorities, please see, **“Our Business”** and **“Government and Other Statutory Approvals”** on pages 100 and 201 respectively.

There is no assurance in the future that the licenses, approvals and permits applied for or held by us will be issued, approved or renewed in a prompt manner, or at all, under applicable law. Our failure to renew or obtain such licenses and approvals in a timely manner, or at all, and comply with the provisions of the applicable laws and regulations could lead to suspension or cancellation of our registration or imposition of sanctions by the relevant authorities, including penalties.

Further, all the licenses issued by the government authorities are issued for a fixed period of time and the license holders are required to fulfil certain conditions for renewal of the license. In case any action being taken by the government authorities against us making us ineligible for renewal of the license required for our business, may affect our result of operations and future prospects of our business adversely.

3. *We derive a significant portion of our revenues from a limited number of customers. The loss of any significant clients may have an adverse effect on our business, financial condition, results of operations, and prospects.*

We derive a significant portion of our revenues from a limited number of customers. For the period ended January 31, 2024 and the Financial Years ended March 31, 2023, March 31, 2022 and March 31, 2021, our revenue from top, top five (5) and top ten (10) customers are as follows:

(in ₹ lakhs)

Particulars*	For January 31, 2024		Financial Year 2023		Financial Year 2022		Financial Year 2021	
	Revenue	%	Revenue	%	Revenue	%	Revenue	%

*As certified by M/s. MASD & Co. LLP, Chartered Accountant, the statutory auditor of our Company, by way of their certificate dated June 25, 2024.

Any decline in our quality standards, growing competition and any change in the demand for our services by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and any loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in the normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

4. We are heavily depended on a limited number of third-party suppliers for their services to us in handling our business operation. The loss of any significant such third-party suppliers may have an adverse effect on our business, financial condition, results of operations and prospects.

We follow an asset light model in our business. Our operations are heavily dependent on use of shipping lines, containers, trucks, machinery and equipment, sorters and conveyors, vehicles and material handling equipment, including reach trucks, forklifts, very narrow aisle trucks etc. and these services are provided to us by third-party suppliers. We have not entered into any long-term agreement for supply of services to us with these suppliers. We have availed a significant portion of these services from a limited number of suppliers or vendors. For the period ended January 31, 2024 and the Financial Years ended March 31, 2023, March 31, 2022 and March 31, 2021, our transactions with top, top five (5) and top ten (10) suppliers are as follows:

(₹ in lakh)

Particulars	For January 31, 2024		Financial Year 2023		Financial Year 2022		Financial Year 2021	
	Revenue	%	Revenue	%	Revenue	%	Revenue	%
Business with Top Single Supplier	894.43	70.90	579.01	33.94	1,141.14	46.95	209.41	32.22
Business with Top five Suppliers	1,148.05	90.99	1,327.31	77.81	1,911.98	78.67	486.58	74.86
Business with Top ten Suppliers	1,193.13	94.57	1,472.76	86.34	2,170.59	89.30	545.39	83.93

*As certified by M/s. MASD & Co. LLP, Chartered Accountant, the statutory auditor of our Company, by way of their certificate dated June 25, 2024.

Any decline in service offerings to us or in quality standards or any increase in costs or changes in other commercial terms which are not favourable for us, our inability to maintain relationship with these third-party suppliers or service providers or retain them at all, may adversely affect our business operations and profitability. We cannot assure that we shall able to generate the same quantum of business, or any business at all, from these third-party suppliers or networks, and any such break or loss in supply side of third-party services to us may adversely affect our timely and cost-efficient services to our customers, which may impact our reputation, business operations, revenues and profitability adversely. Though, our these third-party networks of suppliers of services to us, are much regular in supply of their services, and we have not faced any problem in past from any of such supplier. However, we cannot assure that they will continue to supply their services to us regularly in future at the same competitive rate and timely manner with high quality. Any disruption in the such availability of our requirement from these suppliers, will adversely affect our business, profitability and financial position.

5. Most of our overseas revenue from operations are in and from a single country - Brazil. Due to this geographic concentration of our overseas business operations, our results of operations and growth might be restricted to the economic and demographic conditions of Brazil.

We provide international freight forwarding services and derive a portion of our revenue from international operations. Our overseas revenue from operation to total revenue from operation ratio has been 63.35%, 26.79%, 4.42% and 11.44% for the period ended January 31, 2024, the Financial Year ended March 31, 2023, Financial Year ended March 31, 2022 and Financial Year ended March 31, 2021, respectively. Our majority of overseas business operations and overseas revenue are in and from Brazil. Out of total Revenue from Brazil to total overseas revenue ratio has been 99.00%, 95.56%, 53.50% and 82.46% for the period ended January 31, 2024, the Financial Year ended March 31, 2023, Financial Year ended March 31, 2022 and Financial Year ended March 31, 2021, respectively. For further detail, please see chapter titled **“Our Business”** starting on page 100. A natural calamity, economic slowdown or any disruption in Brazil may hinder us from conducting our business operations in Brazil, economically and otherwise. Due to such factors, we may experience pronounced adverse effects on our results of operations, financial condition and cashflows than if it were further diversified across different overseas geographical locations.

6. *We do not have long-term work orders from our customers. Our business could be adversely affected if we could fail to retain our customers or get continued business from them or we fail to acquire new customers.*

We typically enter into short-term work orders. Within the duration of these work order, the scope of services can vary depending upon the requirements of our customers. Therefore, we need to seek new requirements or cross-sell our service offerings when our current services are completed or terminated with existing customers, and secure new customers in order to expand our business. Similarly, there is no assurance that customers availing our services will look to obtain further services from us or expand their relationship to avail our other offerings. Further, if our customers shift their business for the services we offer to our competitors, or if we are unsuccessful in retaining them by offering competitive rates and favorable contract terms, our business, financial condition, cash flows and results of operations may be adversely affected. The loss or diminution in business from any of our major customers could have a material adverse effect on our revenue from operations. We may not be able to renew our contracts on favorable terms, or at all, or engage new customers in time to reduce the overall customer attrition rate, which could materially adversely affect our revenue and thus our results of operations.

To increase our revenue, we must continue to attract new customers. Our success will depend to a substantial extent on the widespread adoption of our offerings. Numerous factors may impede our ability to add new customers, including but not limited to, our failure to compete effectively against competitors, failure to attract qualified personnel and effectively train our personnel, failure to successfully innovate and deploy new services or failure to provide a quality customer experience and customer support.

7. *Breakdown, Mishaps or accidents during cargo shipment or transportation could result in a loss or slowdown in operations and could also cause damage to life and property.*

The services provided by our Company are subject to operating risks, including but not limited to the breakdown of the vehicles or accidents & mishaps which could affect our service providing capabilities. Though we take all possible measures to reduce the risk of any such breakdown there may be events which may be beyond our control. While, to date, there have not been any notable incidents involving mishaps or major accidents, we cannot assure that these may not occur in the future. Further, we rely on third party service providers like airline carriers, shipping line and other service providers and any mishaps or accidents happening with these service providers may also affect our operations. Any consequential losses arising due to such events will affect our operations and financial condition.

Further, our operations are also dependent on trucks, machinery and equipment, including temperature sensitive and refrigeration infrastructure, data loggers, sorters and conveyors, vehicles and material handling equipment, including reach trucks, forklifts, very narrow aisle trucks. Any significant malfunction or breakdown of third parties' machinery or equipment which we use, may entail significant repair and maintenance costs and cause delays in our operations. Further, if we are unable to repair the malfunctioning machinery or equipment, our operations may need to be suspended until we arrange alternative machinery or equipment to replace the same. Any malfunction or breakdown of machinery or equipment may also cause the quality of products of consignment, including perishable products. Consequently, we may be liable for losses due to damage to our customers'

products. Any breach of our obligations may result in termination of our contracts with our customers, which could have an adverse effect on our business, reputation and financial results. Further, we may also be open to public liability from the end consumer for defects in the quality of perishable products which we transport. Accordingly, any breakdown of our machinery or equipment may have a significant effect on our business, reputation, financial results and growth.

8. *Our Company may not be able to deliver the cargo on timely basis due to which we could become liable to claims by our customers, suffer adverse publicity and incur substantial cost as result of deficiency in our service which could adversely affect our results of operations.*

We provide a total supply chain solution for customer’s logistics and freight management requirements and specialises in delivering end-to-end solutions in the logistics and supply chain services to various industries. We serve the specific requirement of our customers by providing them cargo services. The timely delivery of the cargo at the destination is very crucial in our business. But there can be event which may be beyond our control which could lead to delay in the transportation of the cargo to the customer destination. Further, we may also be unable to effectively address capacity constraints or accurately predict capacity requirements, as a result of which our customers may experience service shortfalls. In some cases, we are also dependent on third parties to provide logistic services which may also lead to delay due to non-availability of the space or right mode of transport which may hamper the delivery schedules to the customer and have an adverse effect on our revenue and cause claims to be initiated against us by the customers. Further, timely delivery of the cargo is the essence of most of the contracts entered with our customers and any delay in the delivery of the cargo may lead to breach of the terms of the contract. Further, we are subjected to the terms as laid down by our customers. Any failure or defect in service or breach of any such terms laid by our customers could result in a claim against our Company for substantial damages, regardless of our responsibility for such failures. A successful assertion of one or more large claim(s) against us that exceeds available insurance coverage of our clients or the imposition of a demurrage charges, could adversely affect our financial condition and results of operations.

9. *There are certain instances of delays in filing returns and/or payment of statutory dues. 11. Our business operations depend on our ability to generate sufficient volumes to achieve acceptable profit margins or avoid losses.

Our business operations are dependent on the availability of sufficient volumes to achieve acceptable margins and avoid losses. The fixed costs do not vary significantly with variations in transportation volumes, and a relatively small change in transportation volumes or the prices we charge to our customers can have a significant effect on our results of operations. Further, difficulties with internal processes or other external adverse influences could lead to shortfalls in revenue. As a result, the success of our business depends on our ability to optimise transportation volumes and revenues. If we are unable to succeed sufficiently at these tasks, we may not be able to achieve acceptable operating or net profit margins, and our business, results of operations and financial conditions could be adversely affected.

12. Foreign Trade restrictions could materially and adversely affect our business, financial condition and results of operations.

Our business may be adversely affected by foreign trade restrictions implemented by countries or territories in which our customers are located or in which our customers' products are manufactured or sold. For example, we are subject to risks relating to changes in trade policies, tariff regulations, embargoes, additional import duties, ban of import/ export of certain goods or other trade restrictions which can adversely impact trade volume between countries. Further, there are trade restrictions imposed on sanctioned countries by other countries and international organisations, affecting movement of international cargo. Any actions by governments or other authorities or

regulators that result in restrictions on movement of cargo or otherwise could also impede our ability to carry out our international freight forwarding operations. In addition, international trade and political issues, tensions and conflicts may cause delays and interruptions to cross-border transportation and result in limitations on our insurance coverage. If we are unable to transport cargo to and from countries with trade restrictions in a timely manner or at all, our business, financial condition and results of operations could be materially and adversely affected.

13. We depend significantly on our vendors to provide transport facilities. A loss of, or a significant decrease in the services provided by our vendors could adversely affect our business and profitability.

We rely on commercial ocean freight carriers and non-vessel owning common carrier (NVOCC) for the shipment of our client's cargo from one port to another. Our Company also relies on third-party vendors to provide assets and services, which inter-alia includes vehicles for inland transportation of goods, containers for carrying goods, warehouses for storage etc. This dependence exposes our Company to the risks associated with the performance and stability of these vendors. Any disruptions or significant decreases in the transportation industry could impact these services' availability, reliability, and cost, directly affecting our Company's ability to fulfil its contractual obligations and meet customer demands. If our Company loses any transportation provider, it may be difficult to find a suitable replacement quickly and at competitive rates. Consolidation within the transportation industry could lead to reduced competition and increased prices for services, impacting on our Company's profitability. Any downturn in the transportation industry could lead to decreased demand for services, putting pressure on our Company's margins and revenue. Any shortage of qualified transportation personnel could lead to service disruptions and increased costs. Occurrence of any such events can adversely affects our business operations, revenue and profitability.

14. We depend on our network of third-party transport operators and logistics infrastructure service providers and global agency networks for the adequate and timely supply of assets necessary for our operations such as vehicles. Any shortage of vehicles for use in our business may also result in additional costs.

We have an asset light business model and have not invested in trucks, containers and other equipment. The assets necessary for our operations such as vehicles, logistic infrastructure are arranged by third-party transport operators and logistics infrastructure service providers and global agency networks. We cannot assure you that these service providers will continue to supply these assets to us in a timely manner or in quantities or prices that are commercially acceptable to us, or at all. Any events which are beyond our control or that of our service providers may also affect the cost or availability of vehicles and related equipment. We or our service providers may be required to make significant expenditure and investments in the event of changes in applicable laws and regulations.

We may, under certain circumstances, be required to hire transportational mode or logistic infrastructure on an ad-hoc basis. Hiring an ad-hoc third-party infrastructure may also significantly increase our operational expenses, which could adversely affect our cost structure. In addition, the availability of third-party vehicles may be uncertain during periods of high demand. In addition, we may not have any control over the servicing and maintenance of these vehicles. Any service interruptions by our partners may result in loss of orders or delays in delivery of goods, any of which could lead to client dissatisfaction and loss of business.

15. We have experienced negative cash flows in previous years. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions.

The details of Cash flows of our Company are as follows:

(Rs. in Lakh)

Particulars	For the period ended January 31, 2024	For the year ended March 31, 2023	For the year ended March 31, 2022	For the year ended March 31, 2021
Net Cash Generated from Operating Activities	80.99	149.35	240.30	-10.58

Net Cash from Investing Activities	-108.95	-184.87	-32.55	-0.28
Net Cash from Financing Activities	-5.35	-61.67	-38.23	-0.41

Cash flow of any entity is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and to make new investments without raising finance from external resources. Any operating losses or negative cash flows could adversely affect our results of operations and financial conditions. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

16. *Seasonal changes affect us, causing our financial results to vary a lot.*

Some of our customers' businesses are subject to seasonality, which in turn, affects our business. We may experience significant seasonal changes that influence demand for our shipping and logistics services. For example, the fourth quarter sees heightened activity due to holiday preparations, whereas the first quarter tends to slow down. Industries, such as retail and agriculture, have distinct peak seasons like harvest times and major shopping holidays. Adverse weather conditions such as hurricanes and snowstorms can disrupt operations and raise costs. Furthermore, regulatory changes can also impact our business seasonally. These factors contribute to fluctuations in our revenue and profitability, underscoring the importance of effectively managing these variations for our long-term success. Any such factors may adversely affect our business operations, revenue and profitability.

17. *There may have been certain instances of non-compliances with respect to certain corporate actions taken by our Company in the past. Consequently, we may be subject to regulatory actions and penalties.*

There were certain instances of delays and non-compliances of regulatory filings with the RoC by our Company. We set out a few instances of such delays and non-compliances: (i) delay in filing of e-form DIR 12 for regularization of additional directors; (ii) error in recording the district/city as "Mumbai" in place of "Thane" of our Registered Office address in form INC-22; (iii) delay in filing of e-form PAS 6 for half yearly compliance for the Fiscals 2021, 2022 and 2023; (iv) erroneous filing of e-form AOC 4 for the Fiscal 2022 wherein unsigned balance sheet and statement of profit and loss were attached instead of the audited financial statements for the Fiscal 2022 and an FIR copy (which was filed at the time against then statutory auditors of the Company which has not been settled and withdrawn) was attached instead of the Auditor's report; and (v) form PAS-3 filed for the rights issue dated May 16, 2015 erroneously classified the allotment in the rights issue as a preferential allotment. However, our Company has made all the requisite filings with additional fees and penalties to the Ministry of Corporate Affairs, as applicable and rectified the non-compliances thereby making the non-compliance good. Further, our Company had issued an interim dividend in the Fiscal 2022 and could not comply with few applicable provisions of the Companies Act. The said interim dividend was directly paid to shareholders. Wherein such amount of interim dividend was required to be deposited in a separate account within five days from the date of its declaration. Our Company failed to open a separate bank account to deposit the interim dividend which was declared and the dividends were not paid within 30 days of its declaration. This happened due to various operational and physical movement related limitations imposed by the Covid -19 global pandemic. Although our Company has suo motto informed and applied for action to RoC on June 24, 2024, we have not yet received any penalty or notices against such non-compliance. We cannot assure you that there will be no penalties or liabilities incurred on account of such non-compliance. Furthermore, there can be no assurance that there will be no delays with the filing of certain documents or non-compliance in filing certain forms/documents in the future. While we shall strive to avoid making typographical errors or human errors in future, make timely filings in line with the timelines prescribed under the law and comply with the applicable provisions of the Companies Act, the rules framed thereunder and other applicable laws, we cannot assure you that we would not be subject to any penalties by regulatory authorities for aforesaid delays and non-compliances. Occurrence of any such events can adversely affects our profitability.

18. *Our diverse and complex multi-location operations subject us to various statutory, legal and regulatory risks.*

Our future revenue growth depends upon the successful operation of our operating locations and effectiveness of or network partners, the efficiency of our delivery systems and the successful management of our sales, marketing,

and support and service teams through direct and indirect channels in various states across India and abroad where our existing or potential clients are located. The expansion of our business may require that we establish our services and network partners in widely disparate geographies with different statutory, legal and regulatory frameworks. In addition, we may be affected by various factors inherent in carrying out business operations in several states in India and abroad, such as:

- coordinating and managing operations in several locations, including different political, economic and business conditions and labour laws and associated uncertainties;
- exposure to different legal standards and enforcement mechanisms and compliance with regulations; and
- difficulties in staffing and managing operations, including coordinating and interacting with our local representatives and business partners to fully understand local business and regulatory requirements.

Any of these factors, alone or in combination, could materially and adversely affect our business, results of operations and financial condition and prospects.

19. *We may face competition from a number of international and domestic third-party logistics companies or custom clearance agents, which may adversely affect our market position and business.*

While the logistics industry in India is generally fragmented, we may face competition from a number of international and domestic third-party logistics service providers and custom clearance agents, especially as the trend toward larger-scale logistics providers in India continues. Some of our competitors may have significantly greater financial and marketing resources and operate larger networks than we do. In the regions of India in which we may operate, we may face competition from certain regional logistics services providers and the unorganized players, some of which have market presence in their respective areas of operation. We may also face competition from new entrants in the logistics service industry. If we cannot maintain, or gain, sufficient market presence or are unable to differentiate ourselves from our competitors, we may not be able to compete effectively. Further, if we cannot maintain cost competitiveness within the third-party logistics industry, including, in the event we choose to expand and incur excessive fixed costs or if we experience a disproportionate increase in costs in comparison to our competitors, our customers could choose to service their third-party logistics needs with our competitors rather than us. Our ability to compete effectively may be constrained by the following factors:

- loss of key members of our management and experienced employees (in particular those from our sales force who have established relationships with our key customers and those who have deep sector expertise that we leverage to provide effective solutions for our customers) to our competitors;
- deployment of more advanced technology platforms by our competitors;
- alliances entered into by our competitors with other logistics services providers, increasing their distribution network or resources and technologies that may not be available to us;
- lower cost base of domestic and regional competitors than ours, increasing their cost competitiveness;
- the deployment by our competitors of a more robust fleet of transportation vehicles;
- difficulties entering new sectors that may be dominated by competitors;
- our competitors having a wider domestic and global network of warehouses and delivery centres; and existing or new competitors pricing their services with significant discounts.

In addition, increased competition may reduce the growth of our customer base and result in higher selling and promotional expenses. If we are unable to compete effectively with our competitors, we may experience a decline in our revenues and profitability and our business, financial condition and results of operations could be materially and adversely affected.

20. *Our Company does not have any long-term contracts with any of the carriers, shipping lines, transporters, etc. which may adversely affect our results of operations.*

Our Company neither has any long-term contract with any of the carriers, shipping lines, transporters, etc. nor any marketing or promotion tie up for our services. Any disruption/discontinuance of their services may affect our inability to deliver our services to the clients, which further may adversely affect our business and profitability.

However, we have been dealing with carriers, transporters, custom clearance etc. on a regular basis and have not faced any material disruption in past three years. We cannot assure you that we will not face any such disruption in future. Any such disruption could affect our business, financial condition, results of operations and profitability adversely.

- 21. *Our freight forwarding business depends upon our network of overseas agents for fulfilment of logistics needs of our customers. Our inability to maintain our relationships with our overseas networks or deficiency in the service provided by such parties may adversely affect our revenues and profitability.***

We depend on our network of overseas networks for cargo handling, transportation, warehousing and timely delivery at the destination and load port for export cargo and import cargo respectively. Any deficiency in the service levels of our overseas networks or losing any such networks or could not maintain relationship with them or could not develop new domestic and overseas networks, could directly impact our business adversely.

- 22. *We do not verify the contents of the cargo transported by us, thereby exposing us to the risks associated with the transportation of goods in violation of applicable regulations.***

We transport various goods as part of our goods transportation and freight forwarding business, other than goods that are classified as hazardous or illegal. We do not have any equipment to enable us to verify all our consignments prior to loading such consignments. Accordingly, we are unable to guarantee that these consignments do not contain any hazardous or illegal goods. In addition, our logistics business could involve movement of confidential documents and information, and unauthorized disclosure of such confidential and sensitive information may result in liability for us. Further, we are subject to a broad range of national, State and local environmental, health and safety and criminal laws and regulations. In the course of our operations, we may store, transport or arrange for the storage or transportation of substances defined as hazardous under applicable laws. If any damage or injury occurs as a result of our storage or transportation of hazardous, explosive or illegal materials, we may be subject to claims from third parties, and bear liability, for such damage or injury even if we were unaware of the presence of the hazardous, explosive or illegal materials, and this could have a material adverse effect on our business and financial condition.

- 23. *We are susceptible to risks relating to fluctuations in ocean freight rate and foreign currency exchange rates.***

We provide international freight forwarding services and derive a portion of our revenue from international operations. Our overseas revenue from operation to total revenue from operation ratio has been 64.00%, 28.03%, 8.28% and 13.87% for the period ended January 31, 2024, the Financial Year ended March 31, 2023, Financial Year ended March 31, 2022 and Financial Year ended March 31, 2021, respectively. Therefore, we have exposure to foreign currency risk arises in respect of our non-Indian rupee-denominated trade and other receivables, trade payables, and cash and cash equivalents. While our presentation and functional currency is the Indian Rupee, we undertake business transactions in various currencies. Any fluctuation in the value of the Indian Rupee against any currency in the currency group will affect our results of operations. Further, we currently do not use any foreign exchange hedging contracts to manage our exchange rate risk. Although we may, in the future, enter into such foreign exchange hedging contracts, we cannot assure you that such hedges will be available or commercially viable or effective to hedge our exposure to foreign currency risks. In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may adversely affect our revenues.

- 24. *We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.***

As on the date of this Draft Prospectus we have registered our logo  under class 39 under the Trademarks Act, 1999. Any failure to renew registration of our registered trademark may affect our right to use such trademark in future. Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third-party claim on any of our unprotected intellectual property may lead to erosion of our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered

brand name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad.

Further, if do not maintain our brand name and identity, which we believe is one of the factors that differentiates us from our competitors, we may not be able to maintain our competitive edge in India and abroad. If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability. Moreover, our ability to protect, enforce or utilize our brand name is subject to risks, including general litigation risks. Furthermore, we cannot assure you that such brand name will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source in India and abroad. Any damage to our brand name, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position in India and abroad. For further details, please see "**Government and Other Statutory Approvals**" starting on page 201.

25. ***The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.***

Timely goods transportation and safety of goods are often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some work orders, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, which could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves for any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us. Any such event could affect our business, financial condition profitability adversely.

26. ***Our logistic operations depend on our ability to generate sufficient transportation volumes to achieve acceptable profit margins or avoid losses.***

Our transportation operations are dependent on the availability of sufficient transportation volumes to achieve acceptable margins and avoid losses. The fixed costs such as employee salary expenses, day to day office running expenses and administrative expenses that are typical in our transportation operations and do not vary significantly with variations in transportation volumes, and a relatively small change in transportation volumes or the prices we charge to our customers can have a significant effect on our results of operations. Further, difficulties with internal processes or other external adverse influences could lead to shortfalls in revenue. As a result, the success of our business depends on our ability to optimise transportation volumes and revenues. If we are unable to succeed sufficiently at these tasks, we may not be able to achieve acceptable operating or net profit margins, and our business, results of operations and financial condition could be adversely affected.

27. ***We may not be able to pass on any increase in costs levied by our business networks / service provider to our clients. Conversely, we may not be able to pass on any decline in prices we charge our clients to our business networks.***

We typically pass on the charges we receive from our business networks to our clients in the pricing of services we offer. However, we may not be able to immediately pass on any short-term increases in these charges to our clients until our contracts are reviewed in accordance with the schedule agreed with our clients, or until we negotiate and finalize the renewal terms with client. We may be susceptible to indirect costs if our business networks or other suppliers decide to impose these additional costs on us in the interim period. Similarly, any fluctuations in the performance of the industries in which our clients operate or in the event of an economic slowdown in India, our clients may negotiate the prices at which we offer our services to them and we may not be able to pass on any decrease in our prices to our business partners. Disagreements on such costs may lead to a loss of clients and may also affect the reliability and quality of the services provided by our business networks and suppliers. We cannot assure you that we will be able to pass on any such increases in the future to our clients, either wholly or in part. If we suffer any long-term increase in costs, our inability to pass on such increases in

costs to our clients or any decline in prices to our business networks may adversely affect our operating margins and consequentially, business, financial condition and results of operations.

- 28. *There have been instances of delayed filings in the past with certain Regulatory Authorities. If the Regulatory Authorities impose monetary penalties on us or take certain punitive actions against our company in relation to the same, our business, financial condition and results of operations could be adversely affected.***

There have been instances of delayed filings in the past with certain regulatory authorities with respect to filings related to GST returns and ESIC payments. As on the date of this Draft Prospectus, there have been no penalties levied on the Company for such delays / defaults. However, it cannot be assured that even in future no such delay will happen or no such penalty will be levied. Therefore, if the regulatory authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected. While we ensure the implementation of required compliance systems, we cannot assure you that such inaccuracies and delayed compliances will not happen in the future and that our Company will not be subject to any action by statutory or regulatory authorities, which may adversely affect our operating margins and consequentially, business, financial condition and results of operations.

- 29. *We are also engaged in the business of Bulk break projects transportation. In case of non-identification of efficient method of transporting or not obtaining statutory permissions in this regard, our operations and profitability could be adversely affected.***

Bulk break projects or Heavy lift transportation is also one of the services provided by our Company, which inter alia include route survey, equipment analysis required for transportation and obtaining statutory permissions before the cargo is transported. In case of heavy lift transport proper route survey helps us to understand the possible obstacles in the route, ascertaining the best possible route, equipment required for the transportation of the cargo and the necessary permission required from different statutory authorities for moving the cargo. In case the route survey conducted by us is inaccurate, or we are unable to identify another efficient method of transporting, or we fail to obtain statutory permissions, it could lead to time and/or cost overrun and/or failure to meet scheduled timeliness. Also, in case an inappropriate route being selected may lead to damage to goods or may require us to find an alternate route which could lead to additional cost being imposed upon us and adversely affect our operations and profitability.

- 30. *Failure to maintain the requisite standard for storage of perishable and other products transported by us could have a negative effect on our business.***

While transportation of products especially temperature sensitive or perishable goods, we are required to maintain the requisite standard for storage of such products that we transport. We achieve this through various means and ensure that we make use of proper temperature-controlled facilities and adhere to specific storage requirements as required by our customers in terms of the agreements entered into with them. However, if we consistently, or frequently, fail to maintain the prescribed or requisite standards, we may be unable to retain our customers, which will have an adverse effect on our business, growth prospects and our financial results.

Further, if the products delivered by us do not meet the requirements specified by our customers, then our customers may dispose of the products in a manner convenient to them, and the cost of such disposal may be adjusted from payments due to us. In the event that we fail to maintain the prescribed and/or requisite standards of storage or if the integrity of products that are stored or distributed is compromised, we could be in breach of our contractual obligations to our customers which could lead, among other things, to monetary damages.

- 31. *We may be unable to attract, recruit and retain employees with the requisite skills may adversely impact our business, results of operations and financial results.***

We rely on the skills, expertise and experience of our employees to provide quality services to our customers. Our business is significantly dependent on our ability to attract, recruit and retain the experienced employees. Experienced and skilled manpower in our industry are highly sought after and competition for talent is intense. Our employees may terminate their employment with us prematurely and we may not be able to retain them. If

we experience any failure to attract and retain competent personnels or any material increase in human resource costs, our competitiveness and business would be damaged, thereby adversely affecting our financial condition and operating results. Further, if we fail to identify suitable replacements of our departed staff, our business and operation could be adversely affected and our future growth and expansions may be inhibited.

- 32. *We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.***

Our business demands substantial funds towards working capital requirements. Normal debtors day in logistic industry and transport industry in country ranges from 60 days to 90 days. Due to shortage of working capital, our Company has not extended credit period prevailing in the industry to our customers and taken hit on revenue growth and profit margins. Our debtors' day were 57 days, 31 days, 21 days and 48 days for the period ended January 31, 2024 and Fiscal 2023 and Fiscal 2022 respectively. Our Company's available net working capital was ₹ 193.7 lakhs, ₹ 81.8 lakhs and ₹ 129.6 lakhs for the period ended January 31, 2024 and Fiscal 2023 and Fiscal 2022 respectively. We intend to follow in future the prevailing credit term practices to our customers i.e. debtors. The working capital requirement for the financial years 2025 and 2026 is projected to be ₹ 510.4 lakhs and ₹ 1,092.0 lakhs, respectively. A significant portion of our working capital is utilized towards trade receivables. We operate in a working capital-intensive industry therefore our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. For further details regarding incremental working capital requirement, please see "**Objects of the Issue**" on page 73.

- 33. *Our success depends heavily upon our Promoter and Directors for their continuing services, strategic guidance and financial support.***

Our success depends heavily upon the continuing services of Animesh Kumar, our Promoter (also our Chairman and Managing Director), who is the natural person in control of our Company. Our Promoter has a vast experience in the business in which we operate. We believe that he has established cordial relations with various customers and industry networks of service providers, which have immensely benefitted our Company. We believe that our relationship with our Promoter, who have been managing customers and handling overall business, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoter and our success depends upon the continuing services of our Promoter who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, we also depend significantly on our other Directors for executing our day-to-day activities. If our Promoter or Directors or any member of the senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

- 34. *Our Company has availed credit facilities and loans from lenders and as per sanction terms and conditions, there are certain restrictive covenants imposed on us. Any non-compliance with the terms and conditions, may adversely affect our business, results of operations and financial conditions.***

We have been sanctioned working capital loan - cash credit facilities from Union Bank of India amounting Rs. 50.00 lakh. Further, we have availed two term loans, amounting Rs. 125.82 lakh from Axis Bank and amounting Rs. 140.00 lakh from ICICI Bank, in May 2024 for purchases of two offices. For further details, please see chapters titled "**Our Business**" and "**Financial Indebtedness**" starting on pages 100 and 196 respectively. As a part of the conditions, during currency of these loans, we require to obtain the lender's consent prior to carrying out certain activities and entering into certain transactions. Failure to meet these conditions or obtain these consents may have adverse consequences on our business and operations. Any such future financing requirements and their financing agreements may have covenants which vary depending on the requirements of the lender(s) extending such loan and the conditions negotiated under each financing agreement. Further, the working capital loans can be recalled

at any time by the lender(s). A failure to observe the covenants under our financing arrangements or to obtain necessary waivers may lead to the termination of our loan facilities, acceleration of amounts due under such facilities and suspension of further access/ withdrawals, either in whole or in part, for the use of the facility, which may adversely affect our business, results of operations and financial conditions.

35. *Changes in technology may render our current technologies obsolete or require us to undertake substantial capital investments, which could adversely affect the results of operations.*

We take all the possible steps to keep ourselves upgraded to the latest technology. Technologies currently under development or that may be developed in the future, if employed by our existing competitors or new entrants, may adversely affect our competitiveness. The development and application of new technologies involves time (i.e. time required for its implementation in system and adoptions by the employees), substantial cost and risk. Our competitors may be able to deploy new technologies, before us and we cannot predict how emerging and future technological changes will affect our operations or cost or the competitiveness of our services. If we fail to successfully implement new technologies in a timely manner or at all, our business, financial condition and results of operations may be adversely affected.

36. *In addition to normal remuneration, other benefits and reimbursement of expenses, our Directors (who are also our Promoter or part of Promoter Group) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company and can influence various decisions of our board of director, which may be detrimental to the interests of other minority shareholders of our Company.*

Animesh Kumar, our Promoter (and also our Chairman and Managing Director) and Shalini Verma, part of our Promoter Group (and also our Whole Time Director) may be interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Promoter and Promoter Group would always exercise their rights as shareholders to the benefit and best interest of our Company. Further, these Directors who are also our Promoter and part of Promoter Group, will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other shareholders may be unable to affect the outcome of such voting. They may also take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority shareholders, such as actions with respect to future capital raising or acquisitions or dividends payment etc. We cannot assure you that our these Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects. Animesh Kumar, our Promoter (and also our Chairman and Managing Director) and Shalini Verma, part of our Promoter Group (and also our Whole Time Director) who were jointly owning the registered office premises of the Company and had rented the same to our Company under the leave and license agreements which were renewed time to time. The last monthly rental as of March 31, 2024 was amounting to ₹1,12,500. Subsequently, our Company has purchased the same from them by entering into an agreement of sale date June 13, 2024. For further details of our transactions or interests of our Promoter or Promoter Group, please refer the chapters titled **“Our Promoter and Promoter Group”** and Note no. 24 titled Related Party Disclosures under chapter titled **“Restated Financial Statements”** beginning on pages 146, and 156 respectively.

37. *Our Company’s insurance coverage may not be adequate to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work.*

Our Company has the policy to assure insurance coverage of shipments under its carriage which we consider reasonably sufficient to cover all normal risks associated with our operations and which we believe are in accordance with the industry practices and standards. We either verify and take confirmation directly from clients that the goods and equipment’s under our carriage must be insured at clients’ costs, risks and accounts or we purchase suitable insurance for and on behalf of client before undertaking the carriage activity. Our existing insurance coverage may be insufficient to cover all the risks associated with our business and operations and generally does not cover losses from business interruption. We also cannot assure you that we will renew our existing insurance policies in a timely manner or at all. In the case of an uninsured loss, a loss in excess of insured limits or a loss for which we do not have coverage or coverage is prohibitively expensive, including those caused

by natural disasters and other events beyond our control. Even if our insurance coverage is adequate to cover our direct losses, we may not be able to take remedial actions or other appropriate measures. Furthermore, our claim records may affect the premiums which insurance companies may charge us in the future. In all such events, we may be required to pay for losses, damages and liabilities out of our own funds, which could materially and adversely affect our business, financial condition and results of operations.

- 38. *We have not obtained credit ratings and may not be able to access capital to finance our operations and future growth of our business, which could have a material adverse effect on our business, results of operations, financial condition, cash flows, and future prospects.***

The cost and availability of capital, among other factors, depends on our credit rating. We have not received any credit ratings, as of the date of this Draft Prospectus. Credit ratings typically reflect, amongst other things, the rating agency’s opinion of the financial strength, operating performance, strategic position, and ability to meet obligations of an entity. The non-availability of credit ratings may increase borrowing costs and constrain our access to capital and lending markets. In addition, non-availability of credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement financing arrangements and, as a result, could adversely affect our business and results of operations.

- 39. *If we are unable to manage our growth effectively or if our estimates or assumptions used in developing our strategic plan are inaccurate or we are unable to execute our strategic plan effectively, our business and prospects may be materially and adversely affected.***

Due to working capital constraint, our revenue and our business operations have not grown in recent years. Now, we plan to continue to expand our scale of operations in future. We may not grow due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & enter into new agreements, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital (which we intend to raise through the proposed Issue), macroeconomic factors beyond our control such as decline in global economic conditions, competition with other players in the organized and unorganized segments, the greater difficulty of growing at sustained rates once we achieve a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we believe that we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and the results of operations.

- 40. *The average cost of acquisition of Equity Shares by our Promoter could be lower than the floor price.***

Our Promoter average cost of acquisition of Equity Shares in our Company could be lower than the Issue Price as may be decided by the Company in consultation with the Lead Manager. The average cost of acquisition of Equity Shares acquired by our Promoter is set out below:

Promoter	Average cost of acquisition per Equity Share (in ₹)
Animesh Kumar	0.11

** As certified by the Statutory Auditor by way of its certificate dated June 25, 2024*

For further detail, please refer the chapters titled “*Capital Structure*” beginning on page 65.

- 41. *Our Company has during the preceding one year from the date of the Draft Prospectus have allotted Equity Shares at a price which is lower than the Issue Price.***

In the last 12 months, we have made allotments of Equity Shares through the bonus issue of Equity Shares to the shareholders, which are given without any consideration to the shareholders. For details relating to number of shares issued, date of allotment etc., please see “*Capital Structure*” on page 65. The Issue Price is not indicative of the price that will prevail in the open market following the listing of the Equity Shares.

42. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or fraud could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct may include breach of security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be sufficient or effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which may end in the writing-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

43. *Our management will have broad discretion in how we apply the Net Proceeds, including interim use of the Net Proceeds, and there is no assurance that the Objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment.*

We intend to use Net Proceeds from the Issue towards funding (i) the working capital requirements of the Company and (ii) general corporate purposes. For details of the Objects of the Issue, please see “*Objects of the Issue*” on page 73. Our management will have broad discretion to use the Net Proceeds, and investors will be relying on the judgement of our management regarding the application of the Net Proceeds. Moreover, we cannot undertake any material deviation in the utilisation of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the approval of our shareholders through a special resolution. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, costs of commodities and interest or exchange rate fluctuations and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this risk factors section may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in its business.

44. *Any Penalty or demand raised by statutory authorities in future will affect the financial position of our Company.*

Our Company is engaged in the logistics and transportation business which attracts tax liability such as Goods and Service Tax, Income Tax (including dividend distribution tax for dividend payment), and Professional Tax as per the applicable provisions of Law. We are also required to comply with the provisions such as registration under the labour laws, ESI contribution of employees. Although, we believe that we have taken all the necessary approvals and deposited the required returns and taxes under various applicable acts, but any demand or penalty raised by the concerned authority in future for any previous year and current year will require additional provision and payments and may adversely affect our profitability and the financial position of our Company.

45. *We have in the past entered into certain related party transactions and may continue to do so in the future.*

Our Company has entered into transactions with certain related parties. We believe that while all such transactions have been conducted on an arm’s length basis and in the ordinary course of business and in accordance and compliance with the relevant provisions of the Companies Act and all others applicable laws. There can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. We confirm that the related party transactions are in compliance with the relevant provisions of the Companies Act and other applicable laws.

Furthermore, it is likely that we may enter related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our business, prospects, results of operations and financial condition, including any potential conflicts of interest or otherwise or detrimental to interest of our minority shareholders. For details on the transactions entered with related parties by us, please see Note no. 24 titled Related Party Disclosures under the chapter titled ***“Restated Financial Statements”*** beginning on page 156.

- 46. *Proposed Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.***

The Objects of the Issue for which the funds are being raised have not been appraised by any bank or financial institution. In the absence of such independent appraisal, the requirement of funds raised through this issue, as specified in the chapter titled ***“Objects of the Issue”*** beginning on page 73 are based on our Company’s estimates and internal research. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. This may result in rescheduling of our expenditure plans and an increase or decrease in our proposed expenditure for a particular object. Deployment of these funds is at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

- 47. *Any variation in the utilisation of Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.***

We propose to utilize the Net Proceeds as stated under ***“Objects of the Issue”*** on page 73. However, our funding requirements and the deployment of Net Proceeds are based on management estimates and have not been independently appraised.

As per section 27 of the Companies Act, the objects of utilization of the Net Proceeds from the fresh issue as disclosed in this Draft Prospectus can only be varied after obtaining the shareholders’ approval vide a special resolution. In the event, the Company wishes to vary the objects for which the net proceeds from the fresh issue are required to be varied, our Company may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations. Therefore, we may not be able to undertake variation of Objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our ability to respond to any change in our business or financial condition, and thus, adversely affect our business and results of operations.

Further, our Promoter would be required to provide an exit opportunity to shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoter to provide an exit opportunity to such dissenting shareholders may deter our Promoter from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI. In light of these factors, we may not be able to undertake variation of Objects of the Issue to use any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in the Draft Prospectus, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

- 48. *We may be affected by competition law, the adverse application or interpretation of which could adversely affect our business.***

The Competition Act, 2002 (“**Competition Act**”) seeks to prevent business practices that have an Appreciable Adverse Effect on Competition (“**AAEC**”) in the relevant market in India. Under the Competition Act, any arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause an AAEC in India is void and attracts substantial monetary penalties. The Competition Act also prohibits abuse of a dominant position by any enterprise. The combination regulation (merger control) provisions under the Competition Act require that the acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by CCI. However, the applicability or impact of the provisions of the Competition Act on any future acquisition or arrangement entered into by us cannot be predicted with certainty at this stage.

- 49. *We have not made any alternate arrangements in order to meet our capital requirements for the Objects of the Issue. Additionally, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, our Company has not made any alternate arrangements for meeting the capital requirements for the Objects of the Issue. We normally meet our capital requirements through our internal accruals. Any shortfall in the same and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please see “*Objects of the Issue*” on page 73.

- 50. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders’ investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate. For details of our dividend history, please see “*Dividend Policy*” on page 151.

- 51. *Any future issuance of Equity Shares may dilute your shareholdings, and the sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuance by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of our Equity Shares. We cannot predict what adverse effect, if any, on market price of our Equity Shares, on account of any sale of Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

- 52. *There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our management and our board of Directors, though it shall be monitored by our Audit Committee.***

As per SEBI ICDR Regulations, appointment of monitoring agency is required only for Issue size above 10,000 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, our audit committee will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended. Further, our Company shall inform about material deviations, if any, in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make

the material deviations / adverse comments of the audit committee public. For details, please refer Chapter titled “*Objects of the Issue*” beginning on page 73.

53. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Prospectus.*

While facts and other statistics in the Draft Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various governmental and organizational web site data that we believe are reliable, we cannot guarantee the quality or reliability or accuracy of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere. For detail of industry facts and other statistics, please see the chapter titled “*Industry Overview*” beginning on page 91.

54. *The requirements of being a public listed company may put strain on time of management, our resources and impose additional requirements.*

Our Promoter or any member of Promoter Group or any Director have no past experience as a public listed company or with the increased scrutiny of its affairs by shareholders, regulators and the public at large that is associated with being a public listed company. As a listed public company, we may need to incur additional legal, accounting, corporate governance and other listing related expenses that we do not incur as an unlisted public company. Our Company will also be subject to the provisions of the listing related compliances which require us to file unaudited financial results on a half yearly basis and other applicable compliances time to time. In order to comply with applicable additional compliances and disclosure obligations, some of additional resources and management time will be required. Further, we are subject to late fee cost of any delay or penalties for non-compliances, as applicable for public listed company. Further, there can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. Any such events could have an adverse effect on our business operations and profitability.

55. *There are restrictions on daily, weekly, monthly movement in the price of the Equity Shares, which may adversely affect the shareholder’s ability to sell for the price at which it can be sold at a particular point in time.*

Post listing, our Equity Shares would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in its price. This applicable circuit breaker operates independently of the index- based market-wide circuit breakers. The percentage limit on circuit breakers is decided by the stock exchange based on the historical volatility in the price and trading volume of a listed equity shares. This circuit breaker limits the upward and downward movements in the price of a listed equity shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

ISSUE SPECIFIC RISKS

56. *Subsequent to the listing of the Equity Shares, we may be subject to surveillance measures, such as the Additional Surveillance Measures and the Graded Surveillance Measures by the Stock Exchanges in order to enhance the integrity of the market and safeguard the interest of investors.*

Subsequent to the listing of the Equity Shares, we may be subject to Additional Surveillance Measures (“**ASM**”) and Graded Surveillance Measures (“**GSM**”) by the Stock Exchanges and the Securities and Exchange Board of India. These measures have been introduced to enhance the integrity of the market and safeguard the interest of

investors. The criteria for shortlisting any security trading on the Stock Exchanges for ASM is based on objective criteria, which includes market-based parameters such as high low-price variation, concentration of client accounts, close to close price variation, market capitalization, average daily trading volume and its change, and average delivery percentage, among others. A scrip is subject to GSM when the share price is not commensurate with the financial health and fundamentals of the company. Specific parameters for GSM include net worth, net fixed assets, PE, market capitalization and price to book value, among others. Factors within and beyond our control may lead to our securities being subject to GSM or ASM. In the event our Equity Shares are subject to such surveillance measures implemented by SEBI and the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

- 57. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

- 58. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.***

The Issue Price of our Equity Shares will be determined by the book-building method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. For details, see “**Basis of Issue Price**” on page 81. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

- 59. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company, adversely affect the trading price of the Equity Shares

and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. Any sale of our Equity Shares by our Promoter or major shareholders or future equity issuances, by us may adversely affect the trading price of our Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. We cannot assure you that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

60. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

61. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

62. *QIB and Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting an Application.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Applications (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting an Applications. Retail Individual Investors can revise their Applications during the Issue Period and withdraw their Applications until Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within 3 Working Days from the Issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Applicant ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS:

63. *Our business and results of operations could be adversely affected by disruptions in global economic and geopolitical conditions.*

Our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax including antidumping duties and countervailing duties, trade, and monetary policies; occurrence of natural or man-made disasters; downgrade in

debt rating; and adverse global economic conditions due to various reasons such as, effect of COVID Pandemic, ongoing dispute between Russia and Ukraine etc. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geopolitical conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavourable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business and profitability.

64. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operations, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with any such changes in applicable law and policy.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

65. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

Under the Companies Act, 2013, a company having share capital and incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of our Equity Shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. The value such a custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

66. *Investors may not be able to enforce judgements obtained in foreign courts against us.*

We are a public limited company under the laws of India. All of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgements against them obtained from courts outside India, including judgements predicated on the civil liability provisions of the United States federal securities laws.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, which includes the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgement from a jurisdiction with reciprocity must meet certain requirements of the Indian Code of Civil Procedure, 1908 (the “**Civil Code**”). The Civil Code only permits the enforcement of monetary decrees, not being in the nature of any amounts payable in respect of taxes, other charges, fines or

penalties. Judgements or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgement for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgement in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favour such final judgement is rendered may bring a fresh suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within three years of obtaining such final judgement. It is unlikely that an Indian court would award damages on the same basis or to the same extent as was awarded in a final judgement rendered by a court in another jurisdiction if the Indian court believed that the amount of damages awarded was excessive or inconsistent with public policy in India. In addition, any person seeking to enforce a foreign judgment in India is required to obtain prior approval of the Reserve Bank of India (RBI) to repatriate any amount recovered pursuant to the execution of the judgement.

- 67. *We are a public limited company under the laws of India. All of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgements against them obtained from courts outside India, including judgements predicated on the civil liability provisions of the United States federal securities laws. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the industry in which we operate, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, and our business, prospects, financial condition and results of operations, in particular.

- 68. *We are subject to regulatory, economic and social and political uncertainties and other factors beyond our control.***

We are incorporated in India, and we conduct our corporate affairs and our business in India. Our Equity Shares are proposed to be listed on the SME platform of BSE Limited, subject to the receipt of the final listing and trading approvals from the BSE Limited. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- political instability, terrorism, military conflict, epidemic or public health issues in India or in countries in the region or globally, including in India's various neighbouring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- Instability in financial markets and volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;

- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- changes in India's tax, trade, fiscal or monetary policies; and
- other significant regulatory or economic developments in or affecting India or its logistics sector.

Moreover, a fall in the purchasing power of our customers, for any reason whatsoever, including rising consumer inflation, availability of financing to our customers, changing governmental policies and a slowdown in economic growth may have an adverse effect on our customers' revenues, savings and could in turn negatively affect their demand for our services. In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of our Equity Shares.

69. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. India has experienced high inflation relative to developed countries in the recent past. Continued high rates of inflation may increase our expenses related to costs of raw material, rent, salaries or wages payable to our employees or any other expenses. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

70. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

71. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for international debt by international rating agencies may adversely affect our ability to raise additional overseas financing in future and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

72. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

73. *The occurrence of natural or man-made disasters may adversely affect our business, financial condition, results of operations and cash flows.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19 and man-made disasters, including acts of war such as Russia and Ukraine, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations.

Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

74. *Our ability to raise foreign capital may be constrained by Indian law.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition and results of operations.

75. *Rights of shareholders under Indian laws may be different from laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as our shareholder than as a shareholder of an entity in another jurisdiction.

Details of the Objects of the Issue

1. PART FUNDING LONG-TERM WORKING CAPITAL REQUIREMENTS OF OUR COMPANY

Our business is working capital intensive and we fund the majority of our working capital requirements in the ordinary course of our business from our internal accruals, share capital and financing from banks and financial institutions by way of working capital facilities including short term loans and unsecured loan from others. To cater to the growing demand from our existing customers and to meet requirements of new customers, we need the additional long-term working capital for the smooth running of our operations and to speed up growth cycle for a higher momentum to penetrate additional business and revenue.

Our business demands substantial funds towards working capital requirements. Normal debtors day in logistic industry and transport industry in country ranges from 60 days to 90 days. Due to shortage of

working capital, our Company has not extended credit period prevailing in the industry to our customers and taken hit on revenue growth and profit margins. We intend to follow in future the prevailing credit term practices to our customers i.e. debtors. The working capital requirement for the financial years 2025 and 2026 is projected to be ₹ 510.4 lakhs and ₹ 1,092.0 lakhs, respectively. A significant portion of our working capital is utilized towards trade receivables.

We have acquired three new offices in Wadhwa Epicentre, Chembur, Mumbai, Maharashtra and one in Mahavir Icon, CBD Belapur, Navi Mumbai, Maharashtra in Fiscal 2023 and Fiscal 2024 for aggregating an amount of Rs. 727.19 lakh. This investment in offices was made by availing loan amounting Rs. 263.70 lakh and from internal accrual amounting Rs. 398.04. This utilization of internal accrual for purchase of these offices has put strain on our availability of internal accrual funds for using towards the long-term working capital. For further detail, please see Chapter titled “**Our Business**” on page 100.

We intend to utilize ₹ 1,000.00 lakh from the Net Proceeds to fund our long-term working capital requirements and these funds are estimated to be utilized in the Financial Year 2025 and Financial Year 2026. We believe that the funding of the incremental long-term working capital requirements of our Company will lead to a consequent increase in our profitability and achieving the proposed targets as per our business plan. As on July 8, 2024, our Company has a total sanctioned limit of working capital facilities of Rs. 50.00 lakh from lender, of which it had utilized Rs. 45.91 lakh. For further information on the terms of these facilities, please see Chapter titled “**Financial Indebtedness**” on page 196.

Rationale on changes in Working Capital cycle in past and future

The table below sets forth the key reasons and assumptions for changes in our working capital cycle:

Particulars	Justification
Inventories	Our business does not require any stock or inventories.
Trade Receivables	<p>The historical holding days of trade receivables has been ranging from 21 days to 57 days during Fiscal 2022 to January 31, 2024. Due to shortage of working capital, we have to take hit on our Revenue (as we could not able to extend credit period for payments to our customers / debtors) and hence our growth in Revenue and our profit margin affected adversely.</p> <p>However, as per the prevalent credit terms and in order to expand Company's operations, slowly from Fiscal 2022 to Fiscal 2023, we have increased our credit terms to our customers / debtors from 21 days to 31 days and further 57 days in January 31, 2024. We intend to follow the prevalent credit terms of the industry and intend to increase it gradually to 90 days, so that we can get better terms from our customers and our profit margin can improve. The holding level for debtors is anticipated at 75 days and 90 days of revenue from operations during Fiscal 2025 and Fiscal 2026, respectively.</p>
Trade Payables	<p>Past trend of Trade payables holding days has been in the ranging from 24 days to 32 days during Fiscal 2022 to January 31, 2024. We could not avail better terms due to working capital shortage from our creditors [i.e. from shipping lines, air carriers, inland transporters, Container Freight Station (CFS) and Inland Container Depots (ICDs)] which impacted our profit margin previously. However, with additional working capital funding, our Company intends to reduce trade payable to 20 days during Fiscal 2025 and Fiscal 2026, respectively and intend to maintain 15 days from Fiscal 2027 and onwards. We believe that timely payment to customers (shipping lines) will be required to avail better margin and thus increase overall profitability of our Company. By reducing the time to settle our Trade</p>

	Payables, we aim to negotiate more favorable terms and conditions with our vendors enabling us to access competitive pricing.

Weighted average cost of acquisition (WACA) (primary issuances) (₹ per Equity Share)						Nil
Secondary Transactions						
						Nil

World Economic Outlook

Global economic growth is expected to remain steady in 2024 with faster trade growth. However, the continuing geopolitical conflicts along with disruptions in trade routes and high public debt burden pose challenge to overall global economic outlook. Further, improving global growth and trade bodes well for the domestic economic growth outlook. The global trade outlook for 2024 remains positive, with merchandise trade expected to pick up after registering a contraction in volumes in 2023. On the global economic scenario, after a year marked by global uncertainties and volatilities, there was greater stability in 2023. While uncertainty stemming from adverse geopolitical developments remained elevated, global economic growth was robust.

The Indian logistics industry

Logistics and transportation Industry is crucial to both enterprises and the economy. In today's interconnected world, shipping and logistics are at the heart of the economy, acting as vital gateways for international trade and business. A nation with a strong and effective logistics sector offers an efficient forward and reverse flow of goods and services, which eventually translates to fast-paced growth. The Indian logistics industry includes all inbound and outbound components of the manufacturing and service supply chains.

Significant factors that will increase the demand for India's logistics sector include the country's anticipated GDP growth of US\$ 26 trillion by fiscal year 2048 (US\$ 6 trillion by 2030) and its objective to accelerate merchandise exports to US\$ 1 trillion by 2030. This would open a huge opportunity for India's transport and logistics sector,

which is expected to increase at a CAGR of 4.5% from 2022 to 2050, reaching 15.6 trillion tonnes kilometres. The Indian transport and logistics business is expected to be around Rs. 13-16 lakh crore (US\$ 156.18-192.23 billion) in 2022. By 2030, India wants to lower its logistics expenditures from 13-14% of GDP to 8-10% of the GDP. It is projected that a 10% reduction in indirect logistics costs is expected to result in a 5% to 8% increase in exports. According to the Logistics Performance Index (LPI) of the World Bank, India has climbed six positions to reach the position of 38th rank out of 139 nations. The improvement is attributed to a variety of factors, including technological advancement, data-driven decision-making, and legislative initiatives targeted at promoting world-class infrastructure. The National Logistics Policy (NLP) and the PM Gati Shakti programme are significant overarching policy moves taken by the central government in this area to deliver outcomes by 2024-25.

Transport and logistics refer to the procedures involved in the manufacture, storage, inventory, delivery, and distribution of specific commodities or services. The logistics sector in India was predicted to account for 14.4% of GDP in 2022. It is the primary source of income for more than 22 million people. The overall logistics sector in India includes 37 export promotion councils, 40 Participating Government Agencies (PGAs), 20 government agencies, 10,000 goods, and 500 certifications. Between the financial years 2015-16 to 2019-20, India invested approximately US\$ 10.2 trillion in the development of infrastructure. The freight movement in India is significantly prejudiced towards road transportation, which transports 66% of goods (in ton-kilometres). This is followed by rail (31%), shipping (3%), and air (1%). To facilitate cargo transportation, India has a vast network of support infrastructure, including 129+ inland container depots, 168+ container goods stations, and 300 m sq. ft. of warehouse capacity.

Indian Port Industry: Introduction

According to the Ministry of Shipping, around 95% of India's trading by volume and 70% by value is done through maritime transport. In November 2020, the Prime Minister, Mr. Narendra Modi renamed the Ministry of Shipping as the Ministry of Ports, Shipping and Waterways.

India has 12 major and 205 notified minor and intermediate ports. Under the National Perspective Plan for Sagarmala, six new mega ports will be developed in the country. The Indian ports and shipping industry play a vital role in sustaining growth in the country's trade and commerce. India is the sixteenth-largest maritime country in the world with a coastline of about 7,517 kms. The Indian Government plays an important role in supporting the ports sector. It has allowed Foreign Direct Investment (FDI) of up to 100% under the automatic route for port and harbour construction and maintenance projects. It has also facilitated a 10-year tax holiday to enterprises that develop, maintain and operate ports, inland waterways and inland ports.

Opportunities

Port support services: Operation and maintenance services such as pilotage, dredging, harbouring and provision of marine assets such as barges and dredgers are expected to increase in coming years. Increasing investment and cargo traffic point to a healthy outlook for port support services. These include Operation and Maintenance services like pilotage, harbouring and provision of marine assets like barges and dredgers. Government plans to replace old Lighthouse Act, 1927, with Aids to Navigation Bill, 2020 and incorporate global best practices, technological developments and India's International obligations in the field of Aids to Marine Navigation.

Ship repair facilities at ports: Dry docks are necessary to provide ship repair facilities. Out of all the major ports, Kolkata has 5 dry docks, Mumbai and Visakhapatnam have 2. The rest have 1 or no dock at all. Given the positive outlook for cargo traffic and the resulting increase in number of vessels visiting ports, demand for ship repair services will go up. This will provide opportunities to build new dry docks and setup ancillary repair facilities.

Increasing Scope for Private Ports: With rising demand for port infrastructure due to growing import (crude, coal) and containerisation, public ports (major ports) will fall short of meeting demand. This provides private ports an opportunity to serve the spill-off demand from major ports and increase their capacity in line with new demand. Cochin Port Trust (CPT) announced measures to increase its revenue by generating higher container traffic and increasing the number of passenger liners. CPT is also planning to setup a small industrial port at the southern end of Willingdon Island to boost business.

SAGARMALA PROGRAM

Port Modernization & New Port Development

In July 2022, the Sagarmala programme is the flagship programme of the Ministry of Ports, Shipping and Waterways to promote port-led development in the country through harnessing India's 7,500 km long coastline, 14,500 km of potentially navigable waterways and strategic location on key international maritime trade routes.

(Source: <https://www.ibef.org/industry/ports-india-shipping>)

It is expected that by 2025, cargo traffic at Indian ports will be approximately 2500 MMTPA while the current cargo handling capacity of Indian ports is only 2400+ MMTPA. A roadmap has been prepared for increasing the Indian port capacity to 3300+ MMTPA by 2025 to cater to the growing traffic. This includes port operational efficiency improvement, capacity expansion of existing ports and new port development.

(source: <https://shipmin.gov.in/division/sagarmala>)

Port Connectivity Enhancement

Connectivity is one of the critical enablers for ports and the end-to-end effectiveness of the logistics system drives competitiveness for the maritime industry as well. With infusion of new technology and capacity building, the cumulative/ total capacity available at ports can match demand but will not be able to handle additional traffic if the evacuation to and from the port is restricted. It is, therefore, important that connectivity of major ports with the hinterland is augmented not only to ensure smooth flow of traffic at the present level but also to meet the requirements of projected increase in traffic.

India's hinterland connectivity is mainly based on surface transport i.e. road and rail, wherein, domestic waterways (coastal shipping and inland waterways) playing a very limited role. Pipelines are predominantly used only for transporting crude oil, refined petroleum products and natural gas. In India, smooth connectivity to ports is even more important as the cargo generating centers are mainly in the hinterland instead of in the coastal region. The long lead distance increases the logistics cost and time variability within which the cargo can be delivered. Under Sagarmala Program, endeavor is to provide enhanced connectivity between the ports and the domestic production/consumption centers.

(Source: <https://shipmin.gov.in/division/sagarmala>)

Port-led industrialization

Vision of the Sagarmala Program is to reduce logistics cost and time for the movement of EXIM and domestic cargo. Development of port-proximate industrial capacities near the coast, in future, is a step in this direction. In

this regard, the concepts of Coastal Economic Zones (CEZs), Coastal Economic Units (CEUs), Port-Linked Industrial & Maritime Clusters and Smart Industrial Port Cities have been introduced.

Each CEZ will consist of multiple CEUs and more than one industrial cluster can be housed within a CEU. Within each industrial cluster there can be several manufacturing units. To accelerate the CEU development process, it is proposed that CEUs be prioritized in locations where land parcels are available in areas close to a deep draught port and with strong potential for manufacturing.

(Source: <https://shipmin.gov.in/division/sagarmala>)

Coastal Community Development

Approximately 18 percent of India's population lives in the 72 coastal districts that comprise 12 percent of India's mainland. Development of coastal communities through Marine sector related activities like fisheries, maritime tourism and corresponding skill development is an essential objective of the Sagarmala Program. Development of cruise tourism and lighthouse tourism are other activities which are being actively considered under Sagarmala Program. Under Sagarmala Program, an integrated approach is being adopted for improvement in quality of life with focus on skill building and training, upgrading of technology in traditional professions, specific and time bound action plan for improving physical and social infrastructure in collaboration with the coastal states.

(Source: <https://shipmin.gov.in/division/sagarmala>)

Promotion of Coastal Shipping & Inland waterway in India

Despite having an extensive network of inland waterways in the form of rivers, canals, backwaters and creeks freight transportation by waterways is highly under-utilized. Waterways currently contribute around 6% to India's transportation modal mix, which is significantly less than that in developed economies and some of the developing economies as well. Addition of information regarding coastal shipping.

It is estimated that coastal shipping traffic of about 250 MMTPA can be achieved from current and planned capacities across coal, cement, iron and steel, food grains, fertilizers, POL by 2025. Additionally about 150 MMTPA of cargo is expected to be moved via inland waterways by 2025.

Availability of dedicated infrastructure will go a long way in promoting coastal shipping as a mode of freight transportation. Hence infrastructure at ports and supporting infrastructure using rail/road and waterways to facilitate coastal movement are being created. These include development of dedicated coastal berths, bunkering and storage at ports and creation of supporting hinterland transport infrastructure with last mile connectivity.

GATI SHAKTI- NATIONAL MASTER PLAN FOR INFRASTRUCTURE DEVELOPMENT

Gati Shakti — a digital platform — will bring 16 Ministries including Railways and Roadways together for integrated planning and coordinated implementation of infrastructure connectivity projects. It will incorporate the infrastructure schemes of various Ministries and State Governments like Bharatmala, Sagarmala, inland waterways, dry/land ports, UDAN etc. Economic Zones like textile clusters, pharmaceutical clusters, defence corridors, electronic parks, industrial corridors, fishing clusters, agri zones will be covered to improve connectivity & make Indian businesses more competitive. It will also leverage technology extensively including spatial planning tools with ISRO imagery developed by BiSAG-N (Bhaskaracharya National Institute for Space Applications and Geoinformatics).

Mumbai Port Trust projects promoting multi-modal connectivity

In line with the goals of PM Gati Shakti, Mumbai Port Trust is undertaking a slew of projects promoting multimodal connectivity. “The Trust has set the goal of seeking harmony between the needs of the cargoes and ships on one hand and the needs of the city (Mumbai) and citizenry on the other” said CMD Shri Rajeev Jalota. The multimodal connectivity master plan of Mumbai Port Trust is founded on two pillars, namely cargo-related projects and Sea Tourism.

I. Cargo-related Projects of Mumbai Port Trust

Expanding POL capacity: The biggest crude oil jetty with a capacity of 22 Million Tonnes Per Annum is constructed at Marine Oil Terminal with pipeline connectivity for its evacuation. This project released other four jetties for more coastal traffic of P.O.L ((Petroleum Oil and Lubricant).

Bunkering Terminal: This project takes advantage of the more than 5,000 ships visiting the Mumbai Harbour annually, utilizing Pipelines connectivity for its evacuation.

Facility for LNG handling: This project shall provide LNG as clean energy up to 5 Million Tonnes per annum without creating stress on land side facilities as the Floating Terminal would be in sea and evacuation of LNG would be through pipelines connectivity with the National Grid.

Barging of containers between JNPT and Mumbai: This project is to get more containers from JNPT through waterways connectivity, by covering only a distance of 14 kms, thereby eliminating a long road journey of 120 kms and its resultant pollution and road congestion.

Coastal facilities: Berth No. 10, 11 of Indira Dock along with a shed, are exclusively reserved for handling of coastal cargo. Erection of temporary silos for bulk commodities of Cement Fly Ash on MbPT land by private parties. EOI has been already invited.

Improving Rail Connectivity: Most importantly, to improve Rail connectivity to the dedicated rail freight corridor to Delhi, Mumbai port is reworking on its rail assets on two fronts. On one hand it has planned to reorganize and upgrade the railway network and operations by handing over the rail assets to a dedicated govt. company - Indian Port Railway & Ropeway company Ltd. On the other hand, a dedicated rail line for port freight movement from Wadala to Kurla is being laid. This will relieve the suburban rail on Harbour line benefitting the commuters.

II. Sea Tourism Projects of Mumbai Port Trust

International Cruise Terminal (ICT): The most important and ambitious project for Cruise Tourism, not only for Mumbai but for India, is the Mumbai International Cruise Terminal, which is under development at Ballard Pier extension berth at an estimated cost of Rs. 500 Crores. This terminal shall not only be used for Cruise ships, but also by the city folks as it will have retails, Restaurants, leisure areas and many more facilities.

1 km- long Mumbai Port Waterfront at Prince's & Victoria Dock Wall: This integrated water transport hub will have all modern requirements for the leisure and commuting for city folks. This facility has a Ro-Pax Terminal and will include sea side Restaurants, Amphitheatre, Domestic Cruise Terminal, Marina, Floating Restaurants, Harbour Cruises, Water taxis, etc.

Ro-Pax Terminal: It is perfect example of harnessing water ways for commuting / tourist movements and reducing the road traffic. Ro-Pax services between Mumbai and Mandwa opens up a new commuter / tourist transportation connecting these two important nodes. This will be extended to connect to Navi Mumbai's new upcoming airport. The Ropax ship is operating, bringing a huge relief for travelers combining Multimodal transportation of Roadways & Waterways.

Ropeway between Sewree to Elephanta: The World's longest Rope way over the sea of approx. 8 Kms. shall be built in PPP mode costing about Rs.700 Crores. This project will open up new travel mode for the City's population besides giving beautiful view of marine facilities like ships, Marine Oil Terminal, and the upcoming Mumbai Trans Harbour Link etc.

Outlook

Increasing investment and cargo traffic point towards a healthy outlook for the Indian ports sector. Providers of services such as operation and maintenance (O&M), pilotage and harbouring and marine assets such as barges and dredgers are benefiting from these investments.

The capacity addition at ports is expected to grow at a CAGR of 5-6% till 2022, thereby adding 275-325 MT of capacity. Domestic waterways have found to be a cost-effective and environmentally sustainable mode of freight transportation. The government aims to operationalize 23 waterways by 2030.

As part of the Sagarmala project, more than 574 projects worth Rs. 6 lakh crore (US\$ 82 billion) have been planned for implementation between 2015 and 2035. In Maritime India Summit 2021, the Ministry of Ports, Shipping and Waterways identified a total of 400 projects worth Rs. 2.25 lakh crore (US\$ 31 billion) investment potential.

Our freight services of RoRo ships are cost effective, safe and suitable for shipments of cargo on the wheels, either self-propelled or not self-propelled. We arrange a special heavy-duty platform on the wheels to roll on static cargo laden on this platform to connect on RoRo ships to arrange costs effective, safe and suitable shipment solutions.

Lashing & Sea Fastening:

The risk & stability challenges as imposed to project cargo by disturbing turbulent rolling pitching forces in adverse sea transportation conditions is eliminated by us by preparing a suitable structural design of lashing and sea fastening, which effectively holds and secures the cargo and stabilizes the effects of tilting, rolling or pitching or movement backward or forward of cargo.

The design of lashing and sea fastening and the materials used therein vary according to the cargo specifics and transportation mode and transit routing conditions. Lashing materials generally include welded stoppers and clips, chains, wires, turnbuckles and nylon belts, all having proper quality test check certifications.

OTHER INFORMATION

Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of loss related to adverse changes in market prices, including interest rates. In the normal course of business, we are exposed to certain market risks including interest risk.

Interest rate risk

Interest rate risk results from changes in prevailing market interest rates, which can cause a change in the fair value of fixed-rate instruments and changes in the interest payments of the variable-rate instruments. Our operations are funded to a certain extent by borrowings. Our current loan facilities carry interest at variable rates. We mitigate risk by structuring our borrowings to achieve a reasonable, competitive cost of funding. There can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks. Further, we also keep fixed deposits and any change in interest rate results change in our interest income.

Liquidity risk

Adequate and timely cash availability for our operations is the liquidity risk associated with our operations. Our Company's objective is to all time maintain optimum levels of liquidity to meet its cash requirements. We employ prudent liquidity risk management practices which inter-alia means maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities.

Credit Risk

We are exposed to the risk that our counterparties may not comply with their obligations under a financial instrument or customer contract, leading to a financial loss. We are exposed to credit risk from our operating activities, primarily from trade receivables. Though, we believe that our customers to be creditworthy counterparties, which limits the credit risk, however, there can be no assurance that our counterparties may not default on their obligations, which may adversely affect our business and financial condition.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the "UPI Circulars") in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019, SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, had extended the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: This phase has become applicable on a mandatory basis for all public issues opening on or after December 1, 2023 as per the SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI from time to time.

All SCSBs Issuing facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement of SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Applicants to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the LM will be required to compensate the concerned investor.

The Issue will be made under UPI Phase III of the UPI Circular. All SCSBs issuing facility of making application in public issues shall also provide facility to make application using UPI.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 read with SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 02, 2021 and such payment of processing fees to the SCSBs shall be made in compliance with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022. NPCI vide circular reference no. NPCI/UPI/OC No. 127/ 2021-22 dated December 09, 2021, inter alia, has enhanced the per transaction limit in UPI from more than ₹2,00,000 to ₹5,00,000 for UPI based ASBA in initial public offerings.
